

Direct Drive

ASC-55-DD | CAPACITY: 55 GALLONS

The ASC-55-DD is a direct drive drum mixer designed for efficient mixing in standard 55-gallon drums with built-in blades. Built as a lighter-duty counterpart to the ASC-55-BV, this unit eliminates the gear reducer, making it ideal for low to medium viscosity materials where higher speed agitation is required. Its streamlined design ensures smooth, reliable operation with reduced maintenance needs, while the durable construction provides long-term dependability in industrial environments.

CFM REQUIRED @80psi: 25

PEAK TORQUE ft lb: 1.75

MAX RPM: 3000

FEATURES:

- 3/4 HP Air Motor (Radial Piston Motor Available)
- Adjustable Painted Steel Frame
- Brass Needle Valve
- Muffler
- 7/16" Stainless Steel Coupler

**3/4 HP Air Motor
(Radial Piston Motor Available)**

Adjustable Painted Steel Frame
